

Instabile Angina pectoris

EKG: normal oder unspezifisch

Koronargefäß mit Plaque

teilweise stenosierend

keine Myokardnekrose

reversible Ischämie

Troponin negativ

Akuter Myokardinfarkt

NSTEMI

EKG

STEMI

Koronargefäß mit Plaqueruptur

hochgradig stenosierend

komplett stenosierend

Myokardnekrose

subendokardial

transmural

irreversible
Innenschichtischämie

irreversible transmurale
Ischämie

Troponin positiv
